EXPERIENCE

TechStuff Pvt. Ltd. *September 2022 - Cont.*
React Developer ,Indore , M.P

TatvaSoft *May 2022 - July 2022*
Full Stack Intern , Ahmedabad , Gujarat

PROJECTS

ATS Techstuff

Technologies Used: Reactjs, MUI, platejs, slatejs, typescript, React calendar, React Table, GraphQL, MUI Joy

- Developed a personalized Applicant Tracking System (ATS) using React.
- Implemented a dynamic questionnaire feature for HR to create tailored interview questions.
- Integrated seamless payroll management within the ATS for a streamlined hiring process.
- Engineered a user-friendly form editor, empowering HR to create pre-defined forms effortlessly.
- Designed collaborative features for efficient communication and teamwork within the HR team.

Plan Creator

Technologies Used: Reactjs, Nextjs, reshaped, slatejs, typescript, Tailwind CSS, TipTap, Novel, FaunaDB , Atlassian Tree ,React dnd

- Led the end-to-end development of a dynamic React website featuring Plate.js and TipTap editors, providing users with a collaborative platform for document creation.
- Successfully integrated FaunaDB as the backend database, ensuring secure and scalable storage for user data, templates, and documents.
- Implemented a two-tier user system, allowing administrators to create pre-defined templates for users. Users can then access and utilize these templates for document creation.
- Developed and integrated Plate.js and TipTap editors to offer users advanced text formatting capabilities, providing an interface akin to popular word processing software.
- Designed an intuitive user interface enabling users to view a list of available templates and seamlessly create documents based on selected templates, enhancing overall user experience.

VBack Database migrator

Technologies Used: svelte js, svelte kit, skeleton UI, Tailwind css, FaunaDB

- Developed a robust data migration tool using Svelte, enabling users to seamlessly transfer data between FaunaDB instances by specifying source and target database keys.
- Implemented a solution that facilitates the transfer of user-defined collections, system-defined collections, and functions between databases, ensuring a comprehensive migration process.
- Incorporated features to intelligently manage duplicate data during the migration, enhancing the accuracy and integrity of the transferred information.
- Designed time management capabilities within the tool, allowing users to schedule and prioritize data transfers based on their preferences and requirements.
- Empowered users with the ability to manually filter and select specific collections for transfer, providing a customizable approach to data migration and minimizing unnecessary transfers.
